

Junkersfeld, L. and Effenhauser-Schmidt, R.

Guidelines for Authors

www.brewingscience.de

Hans Carl Specialist Publisher welcomes papers dealing with all aspects of brewing, malting and raw materials, inclusively new methods, processes and so on.

Articles about any piece of research should be an original study, in which the authors and co-authors were all involved and contributed to the results of the investigation.

Papers will be peer reviewed. For this we have implemented a group of eminent scientists in the various fields. Responsibility for correct spelling is with the author. Articles can be submitted at any time, but please be aware that there will be a delay of time of 2 months until publication due to the review process. The article will be published exclusively in the English language and online (www.brewingscience.de). Every two months there will be an update, upon all of our subscribers were informed by an e-mail newsletter.

Before you start, please note that

we have to guarantee that our evaluation procedure is completely anonymous, with respect to both the author and the reviewers. Therefore, for every article you send in, we shall need a second copy with all references to the author/reviewer removed (even in the file properties!). This anonymized version should otherwise be the same as the original, i.e. be written according to the guidelines, also regarding tables and figures.

This two-versions policy facilitates and accelerates the whole evaluation process and fulfils our requirements in terms of keeping the period between paper submission and publication as short as possible.

In your anonymized version, please replace that part on the front page right between the title, where the original version has the author reference, with the following anonymized identification line:

BrewingScience Ident-No

If you use line numbering (which is favoured by some reviewers), replacing the author reference by this identification line might change the position of the lines in your article. If this is the case, please make sure to revise your anonymized version in a way that both versions have the same line numbering, for instance by entering as many blank lines as there were lines in the author reference of the original version.

Please also keep in mind to always spell „BrewingScience“ correctly. This is important for our citation factors.

1 Deadline for submitting manuscripts

If manuscripts are submitted until	and accepted by the peer reviewers, then the earliest possible date for publication will be
January, 1st	February, 27th
March, 1st	April, 30th
May, 1st	June, 30th
July, 1st	August, 31st
September, 1st	October, 30th
November, 1st	December, 18th

2 General notes about scientific reports

2.1 Readers

BrewingScience – Monatsschrift für Brauwissenschaft is read by technicians from the brewing and malting industry and suppliers with an interest in background scientific knowledge. The scientific

journal serves to transfer knowledge from out of the colleges, universities and other areas of research, and into the industry, to the commercial examination and control institutes, and to official areas such as supervisory departments. **BrewingScience** – Monatschrift für Brauwissenschaft is internationally considered to be the means through which scientific studies into brewing, carried out by experts from the brewing and beverage industry, are conveyed.

3 Details of presentation

■ Language of publication

Please note that the whole text has to be in English – even the reference to the author, the texts within figures and tables and the bibliography. When using numbers please note that the German 1,5 (in words: one comma five) is 1.5 (in words: one point five) in English, and vice versa.

■ Authors

Author(s) have to be specified by “surname, initials”, please separate several author names by comma.

Please use the tab key instead of a blank between the number and the text!

Please also keep in mind to always spell „BrewingScience“ correctly. This is important for our citation factors.

Author names have to be in italics on their first appearance in the text.

■ Title

The title should be succinct and should bear relevance to the study's objectives.

■ Descriptors

The articles will be catalogued on the BrewingScience archive (www.brewingscience.de) and other reader services. For this a list of no more than six key words should indicate the areas covered by the paper.

■ Abstract

The abstract should contain the more important results which are significant to the objectives of the work reported on.

■ Text

Please include space between figures and measurement units or signs like percent sign, hl, m, °C and so on in the text (for example 3 % or 5 °C).

■ Graphics

When creating diagrams, charts or tables please keep in mind that the BrewingScience Yearbook is black and white only!

■ Classical format

The paper should be presented in the following, classical format:

1 Introduction

The introduction should explain the purpose and the scope of investigation, giving reference to the most important studies carried out on the subject. An account of the current questions surrounding the topic and why this theme was developed should be included.

2 Materials and methods

A short and concise description of the techniques and processes applied in the investigation should be given. Recognised methods of analysis and other publications can also be referred to here.

3 Results and discussion

Introducing the results visual material (such as pictures, figures, tables, and other graphics) should be presented in a distinct manner to show the findings. The figures must be clearly relevant to the text (The use of both tables and figures based on the same data is not allowed).

4 Conclusion/Summary

A summary of the most important results of the study should follow at the end, together with how they bear in relation to the aims of the investigation. New and additional elements at this stage are out of place here.

■ References

References to figures and tables within the text must be written in lower case; references to figures in brackets are to be abbreviated (e. g. (Fig. x, Table x, Eq. x)) In the main text these references have to be written in full, e. g. figure x, table x, equation x.

In the discussion the results of the investigation should be considered in a critical way as well regarding your own as in relation to the findings of others.

Literature references cited in the text should be indicated by serial numbers in brackets (e. g. [12] or [12, 13]). A list of the corresponding literature will appear at the end of the article. Please note that an additional information like "p." or "vol." should be in English. See the examples below for how to reference articles in journals, books etc.

1. Lustig, S.; Bellmer, H.-G.; Eils, H.-G. and Gromus, J.: Geschmacksstabilität und Sudhaustechnologie – Praktische Erfahrungen mit einem neuen Anlagenkonzept, Proc. 27th EBC Congr., Fachverlag Hans Carl, Nürnberg, Germany, 1999, pp. 583-593.

2. Hecht, D. and Hippeli, S.: Role of ns-LTP1 in the Development of Primary Gushing, *BrewingScience – Monatsschrift für Brauwissenschaft*, **61** (2007), no. 11/12, pp. 1-9.

3. Wackerbauer, K.; Hardt, R. and Hendschuch, S.: Lox-Aktivität, Wiederkeimfähigkeit und hydroxylierte Fettsäuren in der Maische, *BRAUWELT*, **142** (2002), no. 13/14, pp. 442-447.

4. Steinhaus, M.: Wichtige Aromastoffe in Hopfen (*Humulus lupulus L.*), dissertation, TU München, 2001, p. 30.

5. Narziß, L.: Abriss der Bierbrauerei, 7th ed., Wiley-VCH Verlag, Weinheim, 2005, p. 194.

6. Kunze, W.: "Technology Brewing & Malting", chapter 4, 4th ed., 2010.

Software tools

For those of you who use "Endnote" software to create the list of references please ask for our specific "BrewingScience output style". If you use "Citavi" software to create the list of references please ask for our specific "BrewingScience.css".

4 Organisational Details

Please submit **manuscripts** on disc or via e-mail (preferably be saved in an rtf-format or MS Word-Dokument) to

Fachverlag Hans Carl

Dr. Lydia Junkersfeld

Andernacher Str. 33a

D-90411 Nürnberg

junkersfeld@hanscarl.com or baier@hanscarl.com

Graphics need to be sent either as a very good quality print-out (DIN A4), as photographs (either black and white or colour), or whenever possible as eps-, or tif-file.

For the footer please specify additionally the **authors' names and addresses** using the following scheme:

Author(s): Title (Prof., Dr. etc.), christian name, surname, institute/company, address, e-mail

Expert Opinion: After sending electronic copies of your paper to the reviewers and appraising you will receive a summary of referee comments via e-mail.

Reprints: Ordering of reprints can be arranged through the Editorial Department, the prices are set by the Production Department. Please contact Mrs. Sabine Raab; phone: 0049/911/952 85-20 or e-mail: raab@hanscarl.com

After publishing authors get free access to "BrewingScience – Monatsschrift für Brauwissenschaft" (www.brewingscience.de) for six months.

If there are any questions please feel free to contact

Dr. Lydia Junkersfeld, Tel.: +49/(0)911/952 85-58, junkersfeld@hanscarl.com
